Creating Depth and Drama in Watercolor

This workshop will explore the importance of value and composition, with an emphasis on seeing and painting the contours of subjects. Every object, from flowers to faces, have shadow contours that make them appear three dimensional. This information packed class will help students see and paint values realistically. Using a limited palette, Kathleen will demonstrate the mixing of triads and explain the importance of grays. Color mixtures can be altered by the ratio of warm to cool color used to enhance the glow of the final painting.
